

ASFA L (9 mm) Hose Clamp AISI 304 Stainless Steel - W4

W4

Manufactured entirely in AISI 304 Stainless Steel, the ASFA LW4 has high corrosion resistance that, combined with the exclusive design of the housing and screw, make this a durable clamp once assembled.

The cold-formed stamped 9mm band, smoothed on the underside, combined with the bevelled band edges protects the hose from any damage. This clamp is especially indicated for use in corrosive environments and in the foodstuffs industry.

DIN 3017. The ASFA LW4 hose clip complies fully with the DIN 3017 norm and also with the directive EU 2002/95/EC.

** The maximum application pressure can vary depending on the type of hose used and the geometry of the coupling.*
